

Low sound cover

EKLN08A1

Sound reduction

Reducing the sound power by 3 dBA

Functional and modern outlook

Smooth and discrete design

Safeguarded performance & warranty

No impact on heating performance and your warranty remains unchanged

Quick installation

Only a couple of steps are needed to build it

Discover a world of silence

The low sound cover is the ideal and practical way to lower the sound of the Daikin Altherma outdoor unit. It allows for the unit to be in line with local regulations on sound emission or in the case of limited space, when the unit is installed close to a neighbouring property. With the use of this new Low Sound Cover, the sound performances of the Daikin Altherma outdoor units can be reduced with an additional -3 dB(A).

Sound reduction

- Reducing the emitted sound with -3 dB(A) which corresponds to more than 50% reduction of the sound level
- To use with Daikin Altherma ERGA-D or ERLQ-C outdoor units
- In night mode, the sound is reduced to less than 35 dB(A) at 3 metres.

Functional and modern outlook

The smooth and discrete design blends in with today's house architecture.

Safeguarded performance & warranty

- The installation of the low sound cover has no impact on the heating performances of your outdoor unit, only the noise is reduced.
- Your warranty remains unchanged.

Quick installation

- The low sound cover is delivered in a flat pack
- It can be installed over a floor or a wall mounted outdoor unit
- The cover can easily be assembled, based on a set of simple and straightforward instructions, delivered with the pack
- The installation of the low sound cover takes less than 20 minutes
